

Dear Cathy:

I've seen Comcast workers replacing cables on buildings nearby. Is TV/Internet cabling throughout Parkfairfax being upgraded or replaced?

Me Too!

Dear MT:

Your cable will only be touched if its original exterior placement does not meet Parkfairfax specs! Comcast staff are reconfiguring cabling so that it runs close to the downspouts on the buildings, and reconnecting the lines at the same location within each unit. Comcast began the re-cabling project in early August and expects to be finished by the end of October. All affected residents received letters informing them of a scheduled work date. These residents can make appointments to ask questions; Alonzo and a Comcast rep are available for these appointments **from 9-10 a.m. on Wednesdays only**. If they need to change the date, they need to contact Alonzo Alexander, the assistant maintenance director (AAlexander@parkfairfax.info). Sorry to disappoint!
