

Dear Cathy Condo!

I live in a Lincoln model and I have been invaded with horrifying insects that look like large brown crickets but they do not chirp... they jump. What can I do to get rid of them?

Invaded by Mutant Crickets

Dear IMC:

Parkfairfax has a contract with a very efficient pest control company that can send a technician on Tuesdays and Thursdays. Call the office and ask for a work order for pest control services in your unit; all you have to do is specify which kind of pest you have. They will treat for ants, roaches, spiders, centipedes, silverfish, millipedes, mice, rats, ticks, pantry pests and drain flies. They will also treat for termites, carpenter ants and bees, wood destroying beetles, hornets, wasps, other bees, and fleas. And they can take care of your invaders, commonly known as cave crickets!
